<b>(54) Title:</b> PRODUCTION OF HETEROLOGOUS POLYPEPTIDES FROM FRESHWATER CAULOBACTER		
<b>(57) Abstract</b> <p>A method is provided for screening <u>Caulobacter</u> suitable for use as host organisms for secretion of heterologous polypeptides. Such <u>Caulobacter</u> have a transport protein homologous to one of the type I transport proteins known in <u>C. crescentus</u>. DNA constructs are also provided which code for a chimera protein of which the C-terminus is a secretion signal of a <u>Caulobacter</u> surface layer protein, other than from <u>C. crescentus</u>. Bacterial cells containing, or which express such DNA constructs and which may secrete the resulting protein, are also provided.</p>
